

## AV-PCA-001 Pre-Conditioned Air Connector

### AV-PCA-010 Snap-in Replaceable Gasket

The **AV-PCA-001** is the ultimate Pre-Conditioned Air connector in the market today. Built with input from the airline industry, the connector provides features targeted at saving you time and money. Its progressive design is both functional and rugged. No other PCA connector in the industry incorporates all of the design elements into one connector.

---

#### AV-PCA-010 Snap-in replaceable gasket

No need to remove the connector from service when the gasket gets worn, simply SNAP-IN a new AV-PCA-010 durable gasket. No caustic glue, scrapping, or cure time. You're back up and running in minutes!

#### Superior air flow and protective screen

Provides the largest internal diameter of any connector, maximizing air flow into the aircraft. No internal nuts or bolts to obstruct air flow. The built in "high flow" F.O.D. screen prevents debris from entering the aircraft.

#### Years of reliable service

Built of high impact UV resistant nylon, the innovative modular design of the AV-PCA-001 is resistant to fuels and chemicals and made to last.

#### Integral spinning PCA hose connection

Eliminates those bulky "bolt-on" swivel adaptors along with the added hardware. Made of high impact UV resistant material, the rotating ring connection eliminates twists and maximizes airflow. The extended ring provides a greater connecting surface for attaching your PCA duct.
