avro GSE

Best on Ground

North American Tough. Ramp Ready.

Engineered for durability. Designed for efficiency.
Made in North America.

Ramp-Proven Engineering. All-Weather Performance.

Proudly engineered and manufactured in North America, the Avro Covered Baggage Cart is designed to perform reliably in all seasons and on the most demanding airport ramps. Built with a bolt together frame, galvanneal finish, and torsion axle suspension, it delivers unmatched durability, maneuverability, and low-maintenance operation. With features like a double actuated braking system, roll-up vinyl curtains, and turntable steering, the Avro Cart offers the perfect blend of **safety, efficiency, and long-term value** for your ground handling fleet.

Torsion Axles PATENTED

Independent suspension system for a smoother, more stable tow with less wear and tear.

Galvanneal Finish

Corrosion-resistant steel coating for superior durability in harsh ramp environments.

Double Safety Braking System PATENTED

Dual-action braking ensures secure stops during loading, unloading, and towing.

Double-Actuated Brake Bar

Engages from either direction for dependable, intuitive operator control.

Heavy-Duty Structural Design

8" gauge mid shelf for Better load support & longer component durability.

Turntable Steering

Allows tight turning radius and improved maneuverability on congested ramps.

4.00 x 8.00 Solid Tires

Maintenance-free and puncture-proof for consistent performance on all surfaces.

E-Hitch

Spring-loaded pintle hitch provides easy, secure, and consistent tow bar engagement.

Reinforced Vinyl Curtain

UV-resistant roll-up curtains with reinforcements for all-weather baggage protection.

Corner Bumpers

Heavy-duty rubber guards reduce impact damage and protect cart integrity.

Why It Works for You

All-Weather Ready

UV- and water-resistant curtains + sealed bearings keep it reliable through rain, heat, and snow.

Low-Maintenance Design

Bolt-on components, sealed bearings, and durable finishes reduce service time and costs.

Safer, Smarter Handling

Anti-slip deck, low entry height & secured canopy to reduce baggage damage and operator fatigue.

Made in North America

Faster lead times, better quality control, and local support—built to North American standards.

Fleet-Ready

Modular design, custom decals, and multiple configurations for fast integration into your operations.

Parts & Service Support

Backed by the **Avro AAA Program** for preventative maintenance, priority parts & expert technical help.

Optional Features Available

- Flat pack for easy storage and transportation
- Middle shelf to maximize storage capacity

Avro Cart v1.2 10 Mar 2026

Built for the Ramp. Backed by Avro.

Operational Advantages

- Zero Tariff Risk – Production in USA & Canada
- Minimum Inventory Always Available (300 units)
- Production Capacity: 250 Carts Per Month
- Two year standard warranty
- Flexible payment terms

Avro's carts outperform what we had before.
Built solid, easy to tow, and always ready.

Finance and Lease Option Available

Why Choose Avro GSE?

- Over 30 years of experience in aviation ground support.
- Full range of GSE including tow tractors, GPUs, belt loaders & more.
- 100% North American manufacturing.
- Dedicated parts and service support team.
- Trusted by airports, airlines, and ground handlers across North America.
